

SESSION 1

HAYDY SEADA

HOW TO BE FREELANCER

Haydy Seada

ABOUT ME

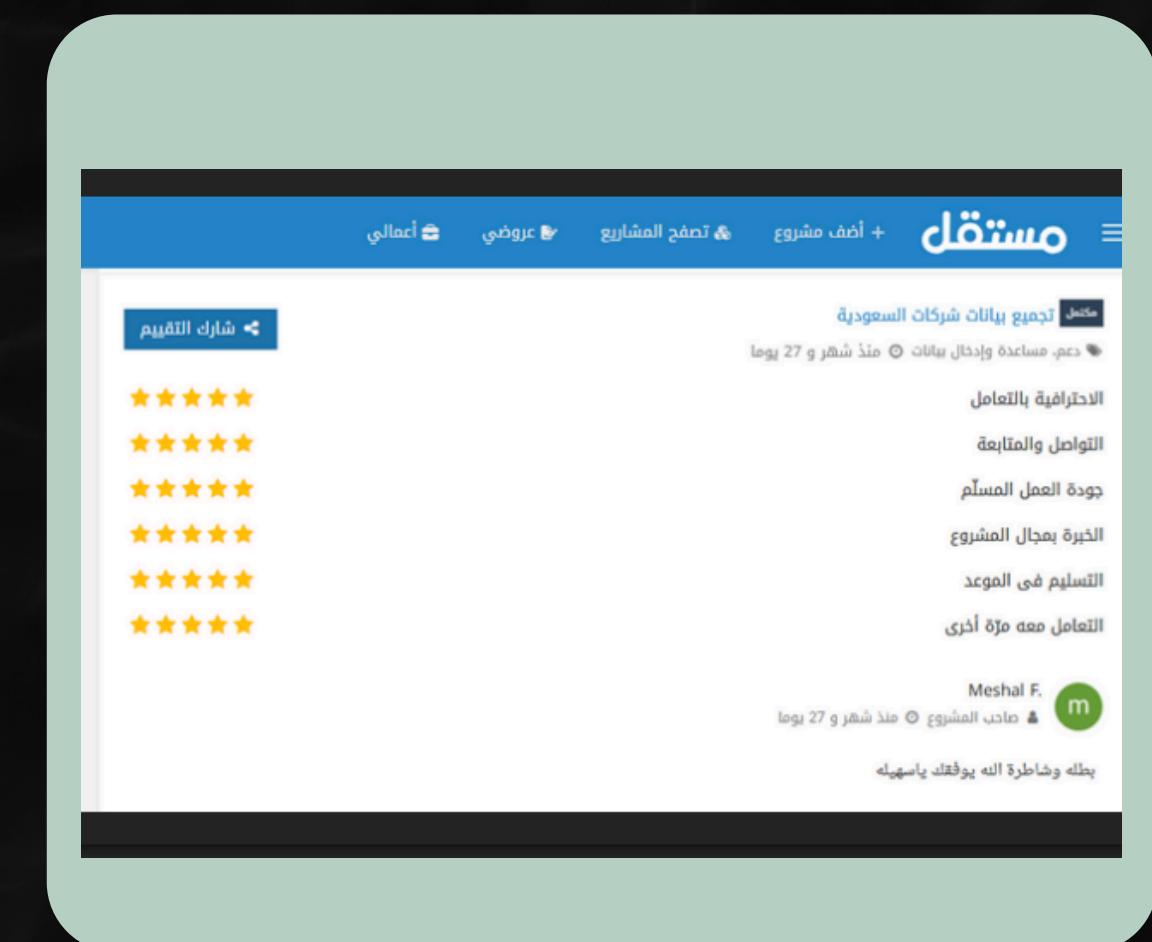

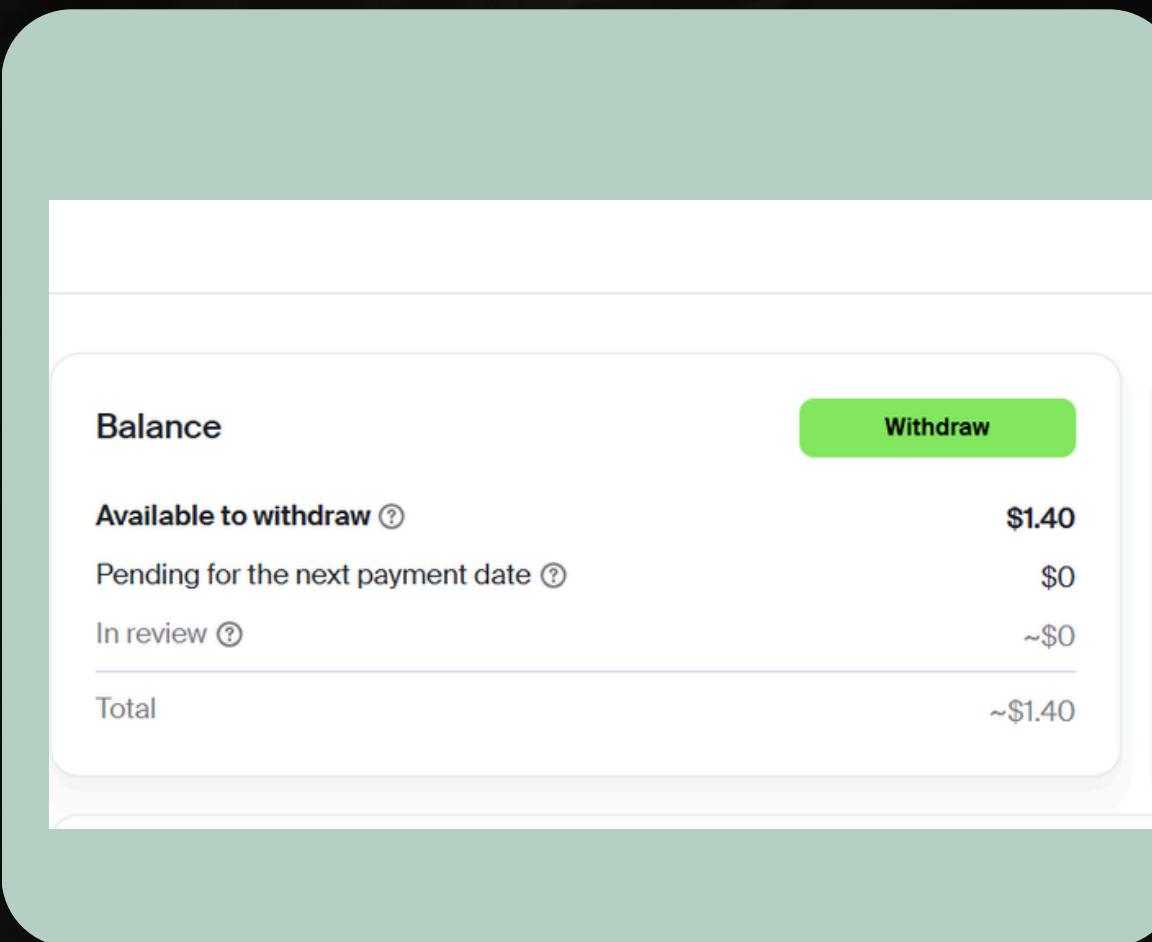

I am a Google-certified Data Analyst with 4 years of freelance experience, specializing in Power BI, Python, SQL, and data visualization. Alongside my freelance career, I have been actively working as a coach and instructor with the Ministry of Communication and Information Technology (DEPI Program), where I train students on data analysis, freelancing skills, and job market readiness.

This is my third round as a coach in the program. In the first round, 91% of my students successfully secured jobs or freelance projects, and in the second round, the success rate rose to 93%. These results reflect my strong commitment to equipping learners with both technical and soft skills that help them thrive in the professional world.

I bring not only technical expertise in data cleaning, modeling, visualization, and automation but also proven experience in mentoring, guiding, and preparing individuals for real market opportunities. My goal is to continue empowering more students to achieve career success in freelancing and data analytics.

2. FEEDBACK

Haidy Seada

3. OUR GOAL

THE MAIN GOAL IS THAT EACH OF YOU COMPLETES THIS TRACK KNOWING HOW TO WORK ON FREELANCING PLATFORMS, ATTRACT CLIENTS, AND SECURE PROJECTS PAID IN FOREIGN CURRENCY.

Haidy Seada

4.GRADUATION REQUIREMENTS

- 3 paid small projects on freelancing platforms.
- Or one large project with a value of around \$300

Note:
must be paid and real project from the freelancing platform .

Haidy Seada

5. OUR PLAN

Our goal together is not just to learn, but to start working as freelancers and secure at least 3 real tasks. To make this happen, we will follow a clear, practical plan:

1. Before each session: The student fills out a form with the number of proposals, responses, accepted projects
2. Active Proposals – Each of you will submit a minimum of 10 proposals per week on freelance platforms.
Consistency is key to getting your first tasks & Publish one service
3. Accounts on All Platforms – You will create accounts on every platform we discuss during the sessions.
This will increase your chances of finding opportunities.
4. Practical Application – Everything we cover in class must be applied, not just watched. You will practice step by step during and after each session.
5. Follow-up & Support – I will be available during the week for 10–15 minutes with each of you to answer your questions, review your progress, and guide you.
6. Portfolio Building – Together, we will build your profiles and portfolios to present you as strong candidates for freelance projects.
7. Accountability & Progress Tracking – Each week, we will review your submitted proposals, responses, and progress toward getting your first tasks.

7. LINKEDIN & CV

Haidy Seada

8. PROPOSAL WRITING

Haidy Seada

9.WEEKLY PLAN

Before our next session, here's what you need to do:

- Send 10 proposals.
- Update your portfolio (About)
- Publish one Gig/Service.
